

## MICROSCOPE 200 : 200x Dual Illumination Fiber Microscope

### Description:

The MICROSCOPE 200 fiber microscopes provide dual-illumination, both coaxial and oblique, to produce the highest-quality image detail and superior view of fiber end face cleanliness and core condition.

A combination of durable construction, comfortable design, easy operation and quality optics ensures that this tool will enhance the performance of installation and maintenance technician.

Industry reports show that CONTAMINATION IS THE No.1 SOURCE OF TROUBLESHOOTING in optical networks, so make sure - ALWAYS INSPECT BEFORE YOU CONNECT!

### Application

- Inspect patch cord (male) side of fiber interconnect
- Inspect various connector types with a wide selection of interchangeable adapters

### Key Features

- Safety filter for eye protection
- Dual illumination of connector end-face illumination
- Reliable white LED
- High quality glass optics
- Anti-slip design, rugged body with rubber grips
- Long life battery
- Ergonomic design, comfortable & easy operation
- Various screw-on connector adaptors available
- 1 year warranty

### Specification

	MICROSCOPE 200
Magnification	200x
Size	185 mm x 48 mm x 30mm)
Weight	210 g (with batteries)
Power	Three "LR44" batteries
LED life	100,000 hours
Package	1 PC/Carton
