

TESTRJ45-11-USB : Testeur de cable réseau RJ11/RJ45/USB

Description:

The remote cable tester, is a palm-sized unit with four different testing ports: RJ-45, RJ-11, USB, and BNC, for the testing of the most popular media of today.

This unit can be used to verify the condition of cables, both before and after their installation.

A passive module can be detached for testing the remote end of installed network cabling.

One button testing offers easy operation and multiple LEDs give clear testing results. The unit will also automatically shut off when not in use.

Features

- Ports:1 x 6-pin RJ-11 Modem
- Ports:1 x 8-pin RJ-45 10/100Base-TX Network
- Ports:1 x Type A USB
- Ports:1 x Type B USB
- Ports:1 x BNC Network
- Batteries:Alkaline Battery

Test Services:

1. Open/Short wire test
2. Connected wires display
3. No connection/No terminator indication
4. Wrong connection/Non-parallel connection display
5. Ethernet and 10BASE-2 terminator value detection
6. Connectivity Media:Twisted Pair 10/100Base-TX
7. Connectivity Media:Coaxial 10Base-2
8. Connectivity Media:Coaxial 10Base-
9. Connectivity Media:Twisted Pair Token Ring

Dimensions: 1.7" x 3.3" x 1"

Length Measurement: 600 ft Coaxial

Length Measurement: 300 ft Twisted Pair
